

ADVANCED LEAK DETECTION SOLUTION

Advanced Leak Detection Solution is a “ready-to-use” liquid designed to be applied to the surface of joints to detect leaks in oxygen and compressed gas systems. No mixing is required.

Advanced Leak Detection Solution is **ABSOLUTELY SAFE**. It contains no oil, grease or other ingredients that could combine with pure oxygen to create either a flammable or explosive mixture.

When used as directed, large leaks will form large bubble clusters. Very fine leaks are indicated by white foam which builds up for half an hour or more, making detection easy and certain.

ADVANCED LEAK DETECTION SOLUTION may be used for ALL oxygen and compressed gas applications, including:

- ◆ Hospitals
- ◆ Medical Facilities
- ◆ Dental Facilities
- ◆ Laboratories
- ◆ Gas Suppliers
- ◆ Inspectors
- ◆ Testing Companies
- ◆ Robotics

What it is:

Advanced Leak Detection Solution is the only known concentrate developed specifically for leak testing lines, cylinders and tanks carrying pure oxygen and compressed gasses.

ADVANCED LEAK DETECTION SOLUTION:

Is ready-to-use. No messy mixing.
Is easy to apply with brush, dauber or spray.
Dries clean. No clean up necessary.
Safely detects leaks, large or small.
Reduces the loss of compressed air or gasses.
Improves air and/or gas delivery lines.
Improves equipment efficiency.
Saves on ENERGY consumption and costs.

*Safe for use
with Oxygen or
Compressed
Gasses*

Instructions for Use:

Advanced Leak Detection Solution is safe, easy, ready-to-use and is designed to be applied to the surface of joints to detect leaks in oxygen and compressed gas systems.

Shake gently before using to mix settled contents:

1. Apply to a test surface with brush, dauber or sprayer.
2. Large leaks will instantly form large bubble clusters.
3. Fine to very fine leaks will form a dense, white foam which builds up for half an hour or more making detection easy and certain.
4. Wipe clean or leave standing. Leaves no oily, greasy residue.
5. When used as instructed, **Advanced Leak Detection Solution** is harmless to all oxygen and medical gas systems.

*A case contains 4 bottles
Shipping weight is approximately 36 lbs

⚠ WARNING!

NEVER use any flammable product such as alcohol to test for leaks on oxygen or compressed air lines, components or equipment.

CAUTION: When handling any chemical solutions, avoid direct contact with skin. Use rubber gloves and protective eye wear.

KEEP OUT OF THE REACH OF CHILDREN
