

## **Metal Fabricator – Equipment Assembler**

We are looking for an organized, versatile individual to work in our fabrication/assembly shop. This position is perfect for someone with various welding, mechanical, plumbing, electrical and painting skills with a heavy desire to dig into a flexible skilled trade. Must have the ability to read, interpret and work from technical drawings and manuals. The ability to design, fabricate and modify a variety of metal work is a plus.

### **JOB DESCRIPTION:**

The primary function for this position will be the welding and fabrication of frames, parts and parts assemblies for equipment packages using the following techniques:

- Cut and join metal parts to fabricate frames, parts and assemblies.
- Mount and plumb equipment, parts and components onto the frames.
- Run electrical throughout equipment and connect to control panels or other power sources.
- Use multiple machines such as drill press, power saws, grinders, sanders, etc. during the buildup.

Applicant must be competent enough to build a package from scratch using the equipment, components, fittings and materials required for each individual package. Plumbing, electrical and mechanical experience will be required for the buildup and assembly of these packages.

The job also includes: Safely operate a forklift to load, off-load and/or move equipment. Prepare frames and paint prepped frames. Run electrical from control panel throughout equipment. Test run equipment. Prepare equipment for shipping. Assist other employees in-house or on the job site when necessary. Deliver or pick up equipment or parts when required. General maintenance, organization and cleaning of work areas. Perform other duties as assigned.
